

KBD card slot to USB conversion

Introduction

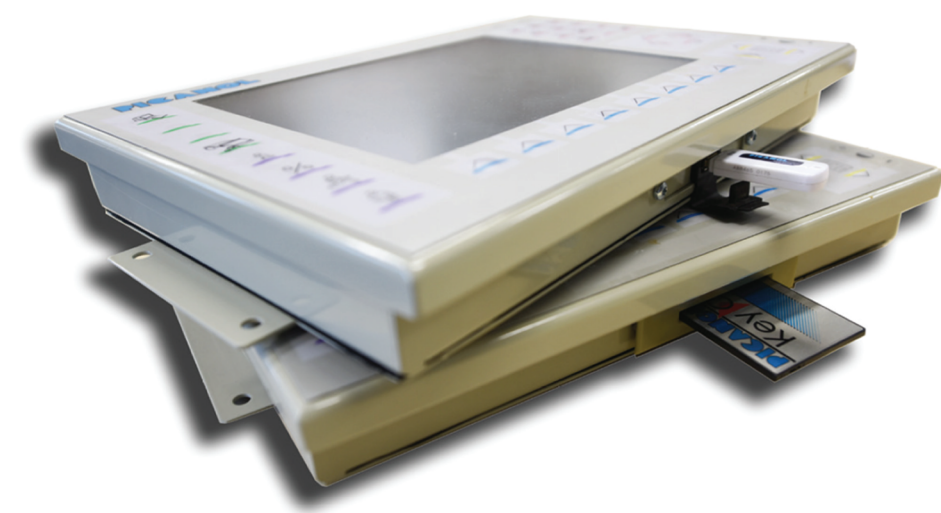

Upgrade of the keyboard display (KBD) to a version with a USB connection for all types of user access to the display.

Working principle

A state-of-the-art USB plug and socket completely replaces the card functions. The translation circuit and USB-socket are added to the existing KBD-print to ensure all the previous communications remain available.

Advantages

- More user-friendly technology
- Larger storage capacity for future requirements
- Less prone to damage in a weaving room environment
- No more need to keep several cards with different functions
- Universal product assuring availability of components now and in future

RETROFIT SOLUTION:

Manufacturing date prior to August 2013

AVAILABLE ON AIRJET:

- OMNI
- OMNI*plus*
- OMNI*plus* 800

AVAILABLE ON RAPIER:

- Gamma
- GamMax
- OptiMax
- GT-Max
- GTMax-*i*

Picanol Original Quality Parts offers a wide range of products and solutions to increase the flexibility, performance and profitability of your installed weaving machines. We provide state-of-the-art technology adapted for your weaving machines, helping you to realize maximum weaving results and value of the machine investment.
