

PosiJet

Working principle

PosiJet is a new revolutionary main nozzle set-up.

With PosiJet, the machine pneumatically positions the main nozzle tubes in an optimal way for inserting the filling yarn. This is all realized while the machine is running.

The PosiJet main nozzle is available in a 4-channel version.

Advantages

- PosiJet does not require a reed with a conical entrance
- PosiJet is easy to set and tune (plug & play)
- The overall stop level of a machine equipped with a PosiJet becomes more stable

Application

Suitable for a wide range of weft SPUN yarns

PATENTED

AVAILABLE ON AIRJET:

- OmniPlus-i
- TerryPlus-i

Picanol Original Quality Parts offers a wide range of products and solutions to increase the flexibility, performance and profitability of your installed weaving machines. We provide state-of-the-art technology adapted for your weaving machines, helping you to realize maximum weaving results and value of the machine investment.
